

October 27, 2009

Hey Dennis,

We just came in from diving the Neaco and Papoose today. We had 80 foot vis. and 80 degrees, not bad for October.

I used the reel on both dives and shot a bag at the end of each dive.

The reel works great! No fuss with keeping it neat or dealing with the typical reel issues. I was able to concentrate on my dive and task at hand, not babysitting a reel.

A few weeks ago I was shark tooth diving checking out three new sites in lower vis.

On each of those dives the reel was handy. We were live boating, not anchored, and I was a good ways from my drop in spot and used the reel to get back. The extra line made the exploration a success. I let the reel spool out while I was riding the scooter. Again, the reel allowed me to look for teeth not tend the reel.

At the end of those dives, I shot a surface marker and did my deco hanging under from the reel.

We are currently sold out so please re-send the same order as we did last time.

Love the product!

Hope to see you in North Carolina Soon!!

Safe Diving,

Bobby Purifoy
